EPG/Event metadata in NorDig TV-Anytime format

This document contains a list of broadcasters, distributors and EPG metadata suppliers who have implemented or are currently implementing NorDig Metadata Exchange format – NorDig TVA metadata as distribution metadata format and have accessible EPG/Event metadata on air.

This list is intended as a B2B support for distributors and EPG metadata service providers and other to get access to standardized correct and updated EPG /Event metadata in NorDig TV-Anytime XML format.

This is only an informative document and NorDig is not responsible for the accuracy of the information in the document.

The document includes information about broadcasters, distributors and EPG metadata suppliers who have implemented and are in production with NorDig TV Anytime metadata and who are in process with implementing. This information makes it possible for partners to get information on what is accessible today and where to find live metadata for distribution and development.

The list is updated by NorDig EPG/Event metadata Group.
