

NorDig Accessibility Package ver. 1.0

This present document describes the intention and content of **NorDig Accessibility Package ver. 1.0**

NorDig release NorDig Accessibility Package ver. 1.0 to support and inform about technical possibilities for development and distribution of best possible accessibility services for the TV users with hearing and vision disabilities.

This **NorDig Accessibility Package ver. 1.0** contains the 3 documents:

- **Amendment to NorDig Unified Requirements specification ver. 3.2.1** including updates / recommendations and changes concerning accessibility services.
- **NorDig IRD v3.2.1 supported Accessibility Services** giving an overview of the different type of accessibility services supported by NorDig specifications.
- **Accessibility services based on HbbTV_NorDig recommendations ver. 1.0** with information about recommendations and implementation guidelines concerning accessibility services based on HbbTV.

Amendment to NorDig Unified Requirements specification ver. 3.2.1 including updates / recommendations and changes concerning accessibility services,

The requirements in the NorDig Unified Requirements specification support as minimum the requirements in the EU regulations about accessibility for consumer IRDs / TV receivers.

This amendment includes updates and changes to support best quality of accessibility services and development of future accessibility services.

This updates and changes to NorDig Unified Requirements is planned to be included in next version.

NorDig IRD ver. 3.2.1 supported Accessibility Services, the purpose of this document is to be a help in developing accessibility services by giving an overview of the different type of accessibility services supported by NorDig specifications and where to find the relevant information and description.

The document also includes some recommendations and implementation guidelines concerning accessibility services.

Accessibility services based on HbbTV_NorDig recommendations ver. 1.0, the purpose of this document is to be a help in planning and developing accessibility services based on HbbTV for NorDig IRDs.

HbbTV gives the possibility to develop and distribute advanced accessibility services cross platforms so the accessibility services will look and function in the same way on any NorDig IRDs with HbbTV.

The document includes information about recommendations and implementation guidelines concerning accessibility services based on HbbTV.

Note: There are no updates or changes to **NorDig Rules of Operation ver. 3.2.1** concerning accessibility services.
