NorDig T report – API HbbTV test cases

NorDig Excom meeting 30th September 2014

API HbbTV – Development of NorDig HbbTV test cases:

- Background
 - NorDig API group identified HbbTV standard test suits is and will be missing a number of important test for NorDig Hybrid markets (languages, Nordic characters, subtitling etc)
 - NorDig decided to specify test cases for requirements missing in HbbTV standard test cases and use same format as HbbTV test suits, this to ensure that NorDig extra test cases can easy be added during HbbTV verification testing.
 - NorDig's HbbTV test cases will be open available (same as NorDig's other specifications) but also most of NorDig's HbbTV test cases will likely be included in HbbTV standard test suits (as optional).
 - Time plan finish by end of 2014 (initially March/April 2014), targeting to be included in the update of the HbbTV standard test suit.
 - NorDig has used Sofia Digital consulting as main editor for NorDig HbbTV test case development (part paid by NRK and part by NorDig), initially estimate of work was around 20 working days.
- Now, autumn 2014
 - Now, during the specification work with test case it has been identified that the total number of test cases needs to grown quite some.
 - Extra work with contacting and access HbbTV Test suits and ensuring their format in drafting
 - Editor company Sofia Digital has spent more time than originally plan
 - **Sofia Digital ask for another 9 kEUR** for chairing the editing and **finalize the specification** of the test case, this mainly due to the grow of more test cases than original plan. NRK said willing to help with part of cost, but asks NorDig to help with the other part. **Excom to decide**
